To the Board of Directors, Management and Employees

Like all of you, I learned of the unfolding brutal and barbaric attacks emanating from Gaza on October 7, 2023, with shock, disbelief, horror, anger and unbearable sadness. Like the aftermath of the terrorist attacks of September 11, 2001, that occurred in the United States a little over 20 years ago, we all understand that life has fundamentally changed and will never be the same again for Israel, as it changed then for the United States.

In addition to these emotions, it's also natural to feel a lack of confidence in the strength and ability of the State of Israel to prevail over its many neighboring enemies, including Hamas, Islamic Jihad, Hezbollah and Iran. During those times, take strength from the knowledge that you are not alone in this fight against what seems like a sea of unending evil. You have the ironclad support not only of the entire Jewish people, but also of the people of the majority of the countries around the world who see what this barbaric attack was – a stain on the entire civilized world – an evil so depraved that it is plain to all that it must be eradicated from this earth once and for all.

We are all just beginning to mobilize our support of Israel, on social media, in our personal communications and in our nation's support in defense of Israel, our greatest friend and ally in the Middle East. Everyone I know is mobilizing to try and do their part to support and defend the State of Israel.

I am so proud of all your work in developing the FIZE kUO device, already deployed in Soroka Medical Center in Beersheba, which fortuitously was the place where over 700 wounded Israelis, including the elderly, women and children were sent for life saving treatment. As you all likely know, a significant risk of major traumatic injuries from gunshot and shrapnel wounds, with the associated major blood loss, is "shock". Take some comfort in the knowledge that FIZE's kUO device will be helping to identify and prevent shock in these patients, potentially increasing their chances at a full recovery from their injuries. It is a testament to the quality of your vision and work that the doctors at Soroka asked for more devices to help with the large number of these patients now filling their ICUs.

In the coming days and weeks, as Israel fights this war against Hamas and its backers in Iran with the support of the United States and its allies, there will be difficult times. I know that many of you are making a great personal sacrifice as you and your family members are called back to active duty to fight this war. During those difficult times, know that we, your deepest and strongest friends will never let the State of Israel fall. We will be there with every kind of support that you will need to prevail.

I have been in communication with our co-lead investors in MIG, to keep them apprised of what is happening in Israel and in particular at FIZE. Together with MIG, Rapha Capital will make sure the company is able to continue its progress through this period and come out stronger and more successful in the end, after Israel has emerged victorious in this war, as it has in every other war in its history.

With deep love, admiration, and respect,

Kevin Slawin
